

MODEL DH3
DIAPHRAGM KIT
Replacment Instructions

TOOLS REQUIRED

$\frac{5}{16}$ Hex Head Nut Driver
Cotton Swab or Small Rag

NOTE: Care **must** be exercised to avoid dust, dirt, etc., from collecting on the replacement diaphragm.

1. Clean outside of driver with a damp cloth to remove any dust or magnetic particles, etc., before disassembly, and make certain that the immediate work area is clear of magnetic particles which might be attracted to the air gap after the driver is disassembled.
2. Remove four hex head screws (Item 2), securing front cover, (Item 3) and lift out diaphragm system subassembly (Item 4).
3. Blow off new diaphragm subassembly (Item 4), visually inspect for foreign material. Carefully place into magnetic structure (Item 5) noting approximate angle shown.
4. Replace Item 1 onto Item 4 and Item 3 onto this assembly, rotating system slightly as required to get screw holes to line up.
5. Replace screws (Item 2), tightening uniformly.
6. Check acoustic quality. Checking in free air at up to 2 volts sinewave while sweeping from about 2 to 5 kHz is an adequate check to verify correct re-assembly.

WARRANTY (Limited). Electro-Voice Professional Sound Reinforcement Loudspeakers and Accessories are guaranteed for five years from date of original purchase against malfunction due to defects in workmanship and materials. If such malfunction occurs, unit will be repaired or replaced (at our option) without charge for materials or labor if delivered prepaid to the proper Electro-Voice service facility. Unit will be returned prepaid. Warranty does not cover finish or appearance items or malfunction due to abuse or operation at other than specified conditions. Repair by other than Electro-Voice or its authorized service agencies will void this guarantee.

Electro-Voice also maintains complete facilities for non-warranty service.
