

SL10-2V Series Bracket Kit Assembly and Installation Instructions

Step 1:

Assemble speaker bracket to enclosure with supplied hardware. Attach rubber bumpers to enclosure as shown in illustration.

Step 2:

Attach wall bracket to wall using appropriate hardware (not supplied).

Note: It is the installer's responsibility to choose and use fasteners correct for the wall construction on site.

Step 3:

Slide enclosure (with speaker bracket attached) over wall bracket.

Suspension Safety Warning

This guide provides instruction on how to install the SL10-2V surround speaker to a wall. Correct use of appropriate hardware is required for secure installation. Only persons with the knowledge of proper hardware and safe installation techniques should attempt to install any sound systems overhead. **CAUTION!** The weakest component determines the size and safety of the entire installation. Before installing any speaker always inspect all components of the installation including building structural supports for cracks, deformations, corrosion or damage that could reduce strength and safety of the installation.

It is the responsibility of the user to ensure that any Electro-Voice loudspeaker system is installed overhead in accordance with all current federal, state, and local regulations.
