

DESCRIPTION AND APPLICATIONS

The Electro-Voice Model 308 suspension shock mount is a new engineering design microphone shock mounting. Replacing the Model 356, the 308 was designed specifically for use with the Model 642 ultra-directional Cardiline microphone. For many applications, the Model 308 may be attached directly to the microphone boom or a floor stand. It allows quick installation or removal of the microphone without tools. Molded neoprene shock cords provide maximum isolation from shock.

SPECIFICATIONS

Material:	Steel, aluminum, Lexan, and neoprene (shock cords)
Finish:	Nonreflecting gray
Dimensions:	(See Figure 1)
Weight:	12 ounces
Accessories:	5/8"-27 stand adaptor

REPLACEMENT PARTS

If for any reason new shock cords may be required, they may be ordered directly from Electro-Voice, Inc., Buchanan, Michigan 49107, Attention: Miscellaneous Parts Department. Request Part #28041. You will be billed for the very nominal cost.
