

Converting P3000 230VAC to 120VAC

Part number	Description	Quantity
352593	label fuse T25A/125V	1
348866	fuse slow blow 25A/125V	2
348855	fuse clip	4
348819	mains transformer P3000A 120V	1
348820	mains transformer P3000B 120V	1
353914	power cord UL/CSA	1
337044	hole plug	2

One minor detail in doing the conversion. The Euro-fuses are fitted with a fuse holder with caps. These have to be replaced by fuse clips on the PC board. After the new fuse holders are installed, there will be 2 holes left in their rear panel of the amplifier. The hole plug listed in the parts list above will fill these holes.
