Music Component Speakers

MUSIC COMPONENT SPEAKERS

Electro-Voice component speakers are the first choice of musicians and audio engineers worldwide. When you need to sound great every time, Electro-Voice speakers really deliver. Through the years, EV has been the premier innovator in speaker component technology. All models feature cast-aluminum frames for superior heat dissipation and incredible ruggedness, even under the stress of constant touring. Edgewound voice coils and beryllium copper lead wires help make the most of every watt of amplifier power, while ensuring long life.

Adding EV speakers to your system provides more acoustic output than the competition, plus their incredible power handling gives you an added margin of safety against loudspeaker failure.

Whether your need is instrument reproduction or wide-range sound reinforcement, you'll find that Electro-Voice component speakers accurately reproduce everything from the sweet, singing sound of a high-octave guitar solo, to the gut-wrenching thump of a big bass drum.

Backed by a full five-year parts-and-labor warranty, Electro-Voice component speakers are the premium choice in component speakers.

FORCE® LOUDSPEAKERS

Force speakers are an ideal way to upgrade your sound without emptying your wallet. Force's large 10-lb magnet assemblies, curvilinear cones and fatigue-resistant suspensions will give you detailed, accurate sound at any listening level. The 150-watt power handling allows use with larger instruments or sound reinforcement amps.

EVM® LOUDSPEAKERS

The Electro-Voice EVM®10M and EVM®12L are some of the most widely used professional speakers available, thanks to their unmatched sound quality and bullet-proof reliability. Their full-bodied tone and pristinely detailed mids add up to "classic" sound for any type of music. Thanks to their massive 16-lb magnet structures and precision voice coils, EVMs can handle 300-watts continuous and 1,200-watts short-term.

BX® LOUDSPEAKERS

The new BX speakers from Electro-Voice are excellent low-frequency reproducers for instrument and sound-reinforcement applications. Their solid, punchy bass and smooth, midrange performance will enhance any musical instrument or sound reinforcement system. The 10BX is especially designed for bass players who use pop/slap techniques and want solid transient performance. The 15BX and 18BX have the fat, solid low-end that have made EV speakers favorites for years.

Model	Power Handling Long & Short Term	Sensitivity*	Frequency Response	Impedance	Weight
Force 10®	150/600 watts	98 dB	75-7,000 Hz	8 ohms	5.44 kg (12.0 lb)
Force 12®	150/600 watts	99 dB	60-7,000 Hz	8 ohms	5.8 kg (12.8 lb)
Force 15®	150/600 watts	100 dB	45-6,000 Hz	8 ohms	5.8 kg (12.8 lb)
EVM®10M	300/1,200 watts	98 dB	90-6,000 Hz	8 ohms	8.16 kg (18.0 lb)
EVM®12L	300/1,200 watts	100 dB	80-5,000 Hz	8 ohms	8.6 kg (19.0 lb)
10BX	150/600 watts	98.5 dB	36-8,000 Hz	8 ohms	5.22 kg (11.5 lb)
15BX	400/1,200 watts	102 dB	30-4,000 Hz	8 ohms	9.10 kg (20.0 lb)
18BX	400/1,200 watts	101 dB	30-4,000 Hz	8 ohms	9.90 kg (22.0 lb)
