SFMC-300 COAX KIT
For RM-300
(single rack mount kit for R300 receiver)
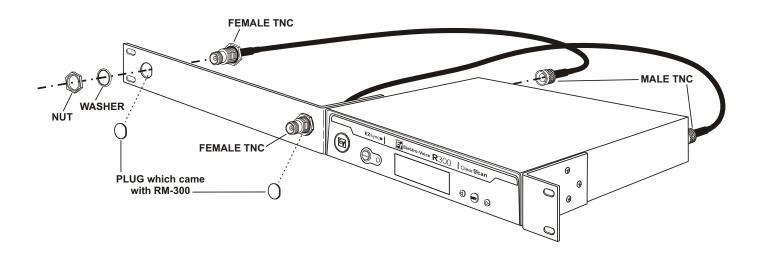

INSTRUCTION SHEET

Figure 1
Attaching Coax Kit for Rack Mounting

General Description

The SFMC-300 Coax Kit is a dual 20" RG58 Coax/TNC outfit designed for front mounting antennas using the RM-300 single rack mount kit.

Assembly

To assemble the coax kit, do the following:

• Remove and save the RM-300 plastic filler plugs to reveal the mounting holes. (See Figure 1).

• Attach the female end of the cable assembly to the rack bracket using the washers and nuts supplied. (See Figure 1.) Tighten securely.

• Attach the male end of the cable assembly to the antenna connectors at the rear of the receiver unit. (See Figure 1.) Tighten securely.

The SFMC-300 Coax Kit for R-300 Single Rack includes necessary hardware.
