Installation

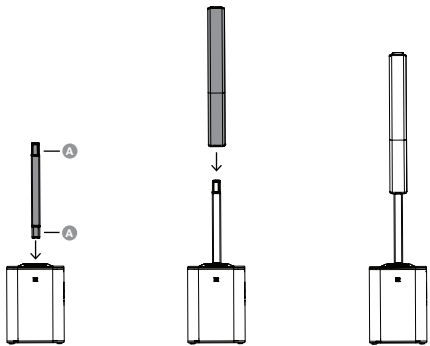

Caution!
Do not attempt to move this loudspeaker system when it is fully assembled. You may damage the system or cause personal injury.

Assembling the loudspeaker system

To assemble the loudspeaker system:

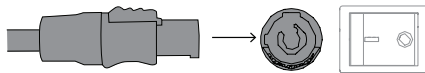

- Place the subwoofer on a level and stable surface.
- Insert the pole into the subwoofer base. The pole has magnets (A) at each end.
- Place the column array loudspeaker system on top of the subwoofer pole.

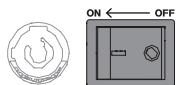

Quick setup

To set up the loudspeaker:

- Connect the AC power cord from a grounded receptacle to the **MAINS IN**.

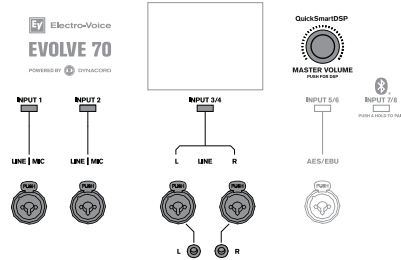

- Switch power to **ON**.

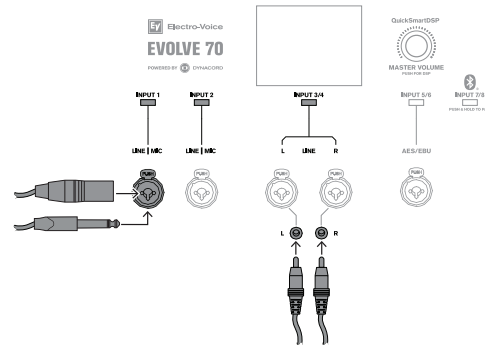

- Adjust the volume (VOL) to 0 dB using the **MASTER VOLUME** knob.

- Press the input selection softkey to select the input channel. The softkey illuminates once selected.

- Use the **MASTER VOLUME** knob to adjust **INPUT LEVEL** to **MUTE**.
- Connect an audio source using appropriate XLR, TRS, or RCA (cinch) cables. Ensure audio source is **MUTE** or at a low level before making connection. After connection is made, increase the source's output to a reasonable level.

- Adjust the **INPUT LEVEL** until the signal peaks are just below maximum level or the required output is achieved. If **PK** is indicated, turn the level down until the **PK** indication disappears.
- Press the input selection softkey again to exit the channel menu.
- Using the **MASTER VOLUME** knob, adjust the volume (VOL) until you get the required output from the loudspeaker.

Using Bluetooth® for audio and control

Pairing Bluetooth® audio

To place the loudspeaker in pairing mode for audio:

- Press and hold the input selection softkey to enable pairing mode. The message **HOLD FOR PAIRING** displays.

Portable column loudspeaker	Input selection softkey
EVOLVE 70 & 90	INPUT 7/8

Table 1: Input selection softkeys to enable pairing mode

Notice!
The loudspeaker remains in control pairing mode for about two minutes. If control pairing fails, repeat step 1 or clean up your Bluetooth-paired devices list.

- Wait until **BT PAIRING MODE ON** and the 4-digit ID display on the LCD.
- On your mobile device's Bluetooth® settings menu, select the corresponding EVOLVE loudspeaker with the matching 4-digit ID. You get a message from your operating system about pairing for each device which has to be accepted. This pairs the mobile device to the EVOLVE loudspeaker for audio streaming.

Connecting the QuickSmart App for control

The QuickSmart App for tablets and smartphones is available for download from the Apple App Store and the Google Play Store.

Download and check the app for the latest firmware updates to enjoy optimal audio performance and maximize your control of the system.

Notice!
The QuickSmart App is designed to only find loudspeakers from Electro-Voice featuring Bluetooth® control functionality. The QuickSmart App does not display other types of Bluetooth® devices, e.g. phones, laptops, tablets, or headsets.

Prior to pairing the QuickSmart App with EVOLVE loudspeakers:

- Make sure that Bluetooth® is enabled on the smartphone or tablet.

Notice!
For Android devices running Android version 11 or older, make sure that location services are allowed.

To connect the QuickSmart App for control:

- Press and hold the input selection softkey to enable pairing mode. The message **HOLD FOR PAIRING** displays.

Portable column loudspeaker	Input selection softkey

Table 2: Input selection softkeys to enable pairing mode

Notice!
The loudspeaker remains in control pairing mode for about two minutes. If control pairing fails, repeat step 1 or clean up your Bluetooth-paired devices list.

- Wait until **BT PAIRING MODE ON** and the 4-digit ID display on the LCD.
- Open the QuickSmart App. All available loudspeakers appear in the **Discovered Speakers** section.
- Select the loudspeaker or loudspeakers you want to pair. The app supports pairing with up to six loudspeakers at a time.

- Select **Connect**. Your mobile device's operating system prompts you to confirm the Bluetooth® pairing request.
- Select **Pair and connect**. Your device then prompts you to synchronize with speaker.
- Select **Synchronize**. The main control screen for a single loudspeaker or for the entire system, if multiple loudspeakers are connected, opens.

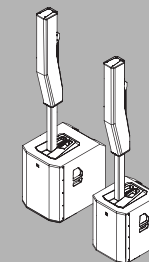

Notice!
Once connected the app checks for the latest firmware and provides an option to update or delay. Check in advance and update the firmware to the latest version.
