

Electro-Voice | EVF-1152D/66-FG Premium arrayable point-source 15" fullyweatherized loudspeaker

EVF-1152D/66-FG Premium arrayable point-source 15" fullyweatherized loudspeaker

- 15-inch arrayable two-way point-source loudspeaker
- Rotatable constant directivity waveguide
- 100 dB sensitivity, 134 dB maximum SPL
- System rating: 600 W continuous, 2400 W peak
- Partially-weatherized PI and fully-weatherized FG versions available with gland nut and stainless-steel grille

The Electro-Voice EVF-1152D/66-FG is a fullyweatherized, fiberglass-coated, high-power, two-way loudspeaker system that can be used in a variety of applications where high-quality sound reinforcement is required in a compact, lightweight package. The EVF-1152D/66-FG utilizes the DH7N, a high-output 3" titanium compression driver, coupled to a Constant Directivity 60° x 60° waveguide. The DVX3151A 15" woofer was developed using FEA optimization for motor, suspension, and electrical design to ensure very low distortion, high efficiency, and maximum intelligibility at high SPL. The crossover uses steep, 24-dB-per-octave slopes with equalization for very smooth response in the vocal range, linear off-axis response, and a protection circuit for long-term reliability.

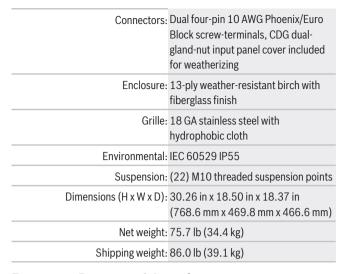

The EVF-1152D/66-FG's features make it ideal for many fixed-install applications, including applications with full exposure to outdoor elements. The trapezoidal enclosure is constructed of weatherresistant birch, and coated with fiberglass for maximum protection from extreme outdoor elements. The unique acoustic and rigging design allows for vertical and horizontal arrays to be built using any combination of loudspeakers from the entire EVF and EVH series. With seven horn patterns to choose from, along with an assortment of low-frequency and subwoofer loudspeakers, you have the tools to maximize flexibility of system design, no matter what the application and budget. The innovative input panel provides a choice of Phoenix-style connector (included in all standard models) or the ability to add a dual NL4-type connector cover plate or gland-nut cover plate (for weatherizing applications). An externally accessible jumper selects passive or active operation.

An available 70.7/100-V transformer kit may be easily mounted to the input panel for use in distributed systems. All these features give you the flexibility to address a large range of venues, quickly and precisely supporting customer requirements with fewer items in inventory.

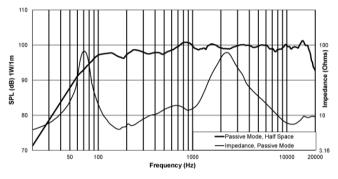

Technical specifications

Frequency response (-3 dB):	107 Hz - 18 kHz
Frequency range (-10 dB):	58 Hz - 21 kHz
Rotatable coverage:	60° x 60°
Rec. high-pass frequency:	55 Hz
Passive crossover frequency:	1300 Hz
Axial sensitivity:	100 dB (1 W/1 m)
Max. calculated SPL:	134 dB
Passive power handling:	600 W continuous, 2400 W peak
Impedance:	8 ohms (nominal), 6.0 ohms (min.)
LF transducer - DVX3151A, 15 in (381 mm) driver	
LF axial sensitivity:	100 dB (1 W/1 m)
LF max. calculated SPL:	133 dB
LF power handling:	500 W continuous, 2000 W peak
LF impedance:	8 ohms (nominal), 7.2 ohms (min.)
HF transducer - DH7N, 3 in (76 mm) diaphragm compression driver	
HF axial sensitivity:	112 dB (1 W/1 m)
HF max. calculated SPL:	137 dB
HF power handling:	75 W continuous, 300 W peak
LIC impedance	9 ohms (nominal) 6.0 ohms (min.)

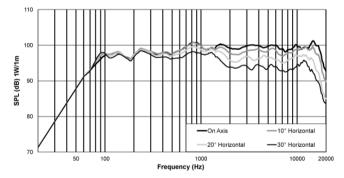

HF impedance: 8 ohms (nominal), 6.0 ohms (min.)

(i) Notice

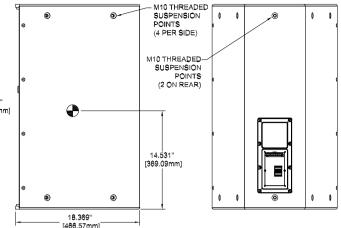

This Electro-Voice loudspeaker should be suspended overhead only in accordance with the procedures and limitations specified in the User's Manual and possible manual update notices. This system should be suspended with certified rigging hardware by an authorized rigging professional and in compliance with local, state, and federal overhead suspension ordinances.
