

Electro-Voice | EVF-1152S/66-FG Arrayable point-source 15" fully-weatherized loudspeaker

EVF-1152S/66-FG Arrayable point-source 15" fully-weatherized loudspeaker

- 15-inch arrayable two-way point-source loudspeaker
- Rotatable constant directivity waveguide
- 101 dB Sensitivity, 134 dB Maximum SPL
- System Rating: 500W Continuous, (2000W Peak)
- Partially-weatherized PI and fully-weatherized FG versions available with gland nut and stainless-steel grille

The Electro-Voice EVF-1152S/66-FG is a fully-weatherized, fiberglass-coated, high power, 2-way loudspeaker system that can be used in a variety of applications where high quality sound reinforcement is required in a compact, lightweight package. The EVF-1152S/66-FG utilizes the ND2B, a high output 2" titanium compression driver, coupled to a Constant Directivity 60° x 60° waveguide. The SMX2151 15" woofer used FEA optimization for motor, suspension, and electrical design for very low distortion, high efficiency, and maximum intelligibility at high SPL levels. The crossover uses steep 24 dB/octave slopes with equalization for very smooth response in vocal range, linear off-axis response, and a protection circuit for long term reliability.

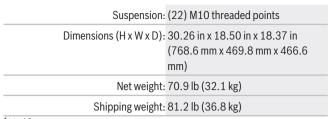

The EVF-1152S/66-FG features make it ideal for many fixed install applications, including applications with full exposure to outdoor elements. The trapezoidal enclosure is constructed out of weather resistant birch, and coated with fiberglass for maximum protection from extreme outdoor elements. The unique acoustic and rigging design allows for vertical and horizontal arrays to be built using any combination of loudspeakers from the entire EVF & EVH Series, with 7 horn patterns to choose from and an assortment of Low Frequency and subwoofer loudspeakers, it gives you the tools to maximize flexibility of system design, no matter what the application and budget. The innovative input panel provides phoenix style connectors (included in all standard models) and gland nut cover plate (for weatherizing applications). An externally accessible jumper selects passive or active operation. An available 70.7/100 Volt transformer kit simply mounts to the input panel for use in distributed systems. All

these features give you the flexibility to do a large range of venues in extreme environments with fewer items in inventory and quickly support your customer's requirements.

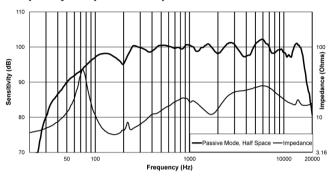

Technical specifications

| Frequency response (-3 dB): | 112 Hz - 14 kHz ¹ |
|-----------------------------|---|
| Frequency range (-10 dB): | 55 Hz - 18 kHz ¹ |
| Rec. hipass frequency: | 55 Hz |
| Axial sensitivity: | 101 dB (1W/1m) |
| Max. calculated SPL: | 134 dB |
| Horizontal coverage: | 60° |
| Vertical coverage: | 60° |
| Power handling: | 500 W continuous, 2000 W peak |
| LF transducer: | SMX2151, 15 in (381 mm) driver |
| HF transducer: | ND2B, 2 in (51 mm) diaphragm compression driver |
| Crossover frequency: | 1450 Hz |
| Nominal impedance: | 8Ω |
| Minimum impedance: | 6.0 Ω |
| Connectors: | (2) 4 Contact 10 AWG Phoenix/ Euroblock style screw terminal, gland nut with input panel cover included for weatherizing |
| Enclosure material: | 13 Ply weather resistant birch, fiberglass finish |
| Grille: | 18 GA Stainless steel with hydrophobic cloth and rotatable logo |

(i) Notice

This Electro-Voice loudspeaker should be suspended overhead only in accordance with the procedures and limitations specified in the User's Manual and possible manual update notices. This system should be suspended with certified rigging hardware by an authorized rigging professional and in compliance with local, state, and federal overhead suspension ordinances.
